UNCLE JERRY'S PERSIAN SHEEP.

Sixteen of the Astrachan Breed Imported to Found a Colony. Sixteen immigrants, the like of which never landed before on American soil, have been welcomed by the representatives of the Government at this port. They are fine sheep from Persia of the breed known as Astrachan fat-tailed sheep. They arrived yesterday on the National line steamship sicivetia and they will go direct to California, where, under the kindly eye of California, where, under the kindly eye of fecretary Rusk, of the Department of Agriculture, they will endeavor to found a large family of producers of Astrachan wool.

Secretary Rusk, aided by Truxton Beale, Minister to Persia, has studied the characteristics of this breed of aheep, and while efforts to introduce them into England Inited because of the climate, it is believed that California will just soit them and that these sixteen will hardly realize that they have left their naive land. Two of the sixteen are pure white. The rest are brown or black. Three lambs were born during the voyage.
